CONTENTS OF VOLUME 37

Number 1

W. J. DRUGAN and XING-YU CHEN	1	Plane strain elastic–ideally plastic crack fields for Mode I quasistatic growth at large-scale yielding—I. A new family of analytical solutions
SAN-XIA GONG and H. HORII	27	General solution to the problem of microcracks near the tip of a main crack
L. M. BROCK	47	An exact transient analysis of dislocation emission and fracture
F. ELLYIN and Z. XIA	71	A rate-independent constitutive model for transient non-proportional loading
B. BUDIANSKY and J. C. AMAZIGO	93	Toughening by aligned, frictionally constrained fibers
R. BECKER, R. E. SMELSER and O. RICHMOND	111	The effect of void shape on the development of damage and fracture in plane-strain tension
Announcement	131	Advanced Courses in 1989, International Centre for Mechanical Sciences

Number 2

H. GAO	133	Application of 3-D weight functions—I. Formulations of crack interactions with transformation strains and dislocations
H. GAO and J. R. RICE	155	Application of 3-D weight functions—II. The stress field and energy of a shear dislocation loop at a crack tip
J. M. HILL and A. I. LEE	175	Combined compression and torsion of circular cylindrical pads of rubber

S. V. HARREN and R. J. ASARO 191 Nonuniform deformations in polycrystals and aspects of the validity of the Taylor model

N. A. FLECK and D. DURBAN 233 Asymptotic fields at tip of conical notches and inclusions in a power hardening solid

H. PETRYK 265 On constitutive inequalities and bifurcation in elastic–plastic solids with a yield-surface vertex

Number 3

S. A. SILLING 293 Phase changes induced by deformation in isothermal elastic crystals

P. SOFRONIS and R. M. MCMEEKING 317 Numerical analysis of hydrogen transport near a blunting crack tip

K. ADEROGBA 351 The force on a singularity in a two-phase layer

D. A. KOURIS and T. MURA 365 The elastic field of a hemispherical inhomogeneity at the free surface of an elastic half space

J. D. ACHENBACH and H. ZHU 381 Effect of interfacial zone on mechanical behavior and failure of fiber-reinforced composites

C. L. HOM and R. M. MCMEEKING 395 Three-dimensional void growth before a blunting crack tip

Number 4

J. QU and J. L. BASSANI 417 Cracks on bimaterial and bicrystal interfaces

J. L. BASSANI and J. QU 435 Finite crack on bimaterial and bicrystal interfaces

A. F. BOWER 455 Cyclic hardening properties of hard-drawn copper and rail steel

A. F. BOWER and K. L. JOHNSON 471 The influence of strain hardening on cumulative plastic deformation in rolling and sliding line contact

K. UETANI 495 Uniqueness criterion for incremental variation of steady state and symmetry limit

N. A. FLECK, J. W. HUTCHINSON and V. TVERGAARD 515 Softening by void nucleation and growth in tension and shear

Announcements 541 International Conference on Mechanics of Jointed and Faulted Rock

542 Symposium on Analytical and Computational Models for Shells

543 Plasticity '89

Number 5

S. Q. NGUYEN and N. TRIANTAFYLLIDIS 545 Plastic bifurcation and postbifurcation analysis for generalized standard continua

A. CARPINTERI 567 Cusp catastrophe interpretation of fracture instability

L. M. BROCK and J.-S. WU 583 Transient analysis of dislocation emission from a growing crack

N. LAWS and J. C. LEE 603 Microcracking in polycrystalline ceramics: elastic isotropy and thermal anisotropy

J. M. HERRMANN and J. R. WALTON 619 On the energy release rate for dynamic transient anti-plane shear crack propagation in a general linear viscoelastic body

M. C. BOYCE, G. G. WEBER and D. M. PARKS 647 On the kinematics of finite strain plasticity

Announcements 667 IUTAM Symposium—Inelastic Deformation of Composite Materials

668 Symposium on Computational Technology for Flight Vehicles

669 31st Israel Annual Conference on Aviation and Astronautics

670 Third International Conference on Constitutive Laws for Engineering Materials

671 22nd Midwestern Mechanics Conference

Number 6

M. SAEEDVAFA and J. R. RICE — 673 Crack tip singular fields in ductile crystals with Taylor power-law hardening. II: Plane strain

A. C. F. COCKS — 693 Inelastic deformation of porous materials

W. E. WARREN, A. M. KRAYNIK and C. M. STONE — 717 A constitutive model for two-dimensional nonlinear elastic foams

F. HESS and A. W. SLEESWYK — 735 Anisotropic strain hardening in f.c.c. polycrystals: a phenomenological model

R. A. BOUSFIELD and P. SAMUELS — 749 Looped equilibrium paths in interactive buckling near a compound bifurcation

T. KOBAYASHI and J. H. GIOVANOLA — 759 Crack opening profile observations for dynamic cleavage crack propagation and arrest

R. FORTUNIER — 779 Dual potentials and extremum work principles in single crystal plasticity

Announcement — 791 First International Conference on Vibration Problems of Mathematical Elasticity and Physics
